STORMWATER &  
 WETLAND DESIGN

SHEET 1 OF 1

# GARDNER DISTRICT COURTHOUSE

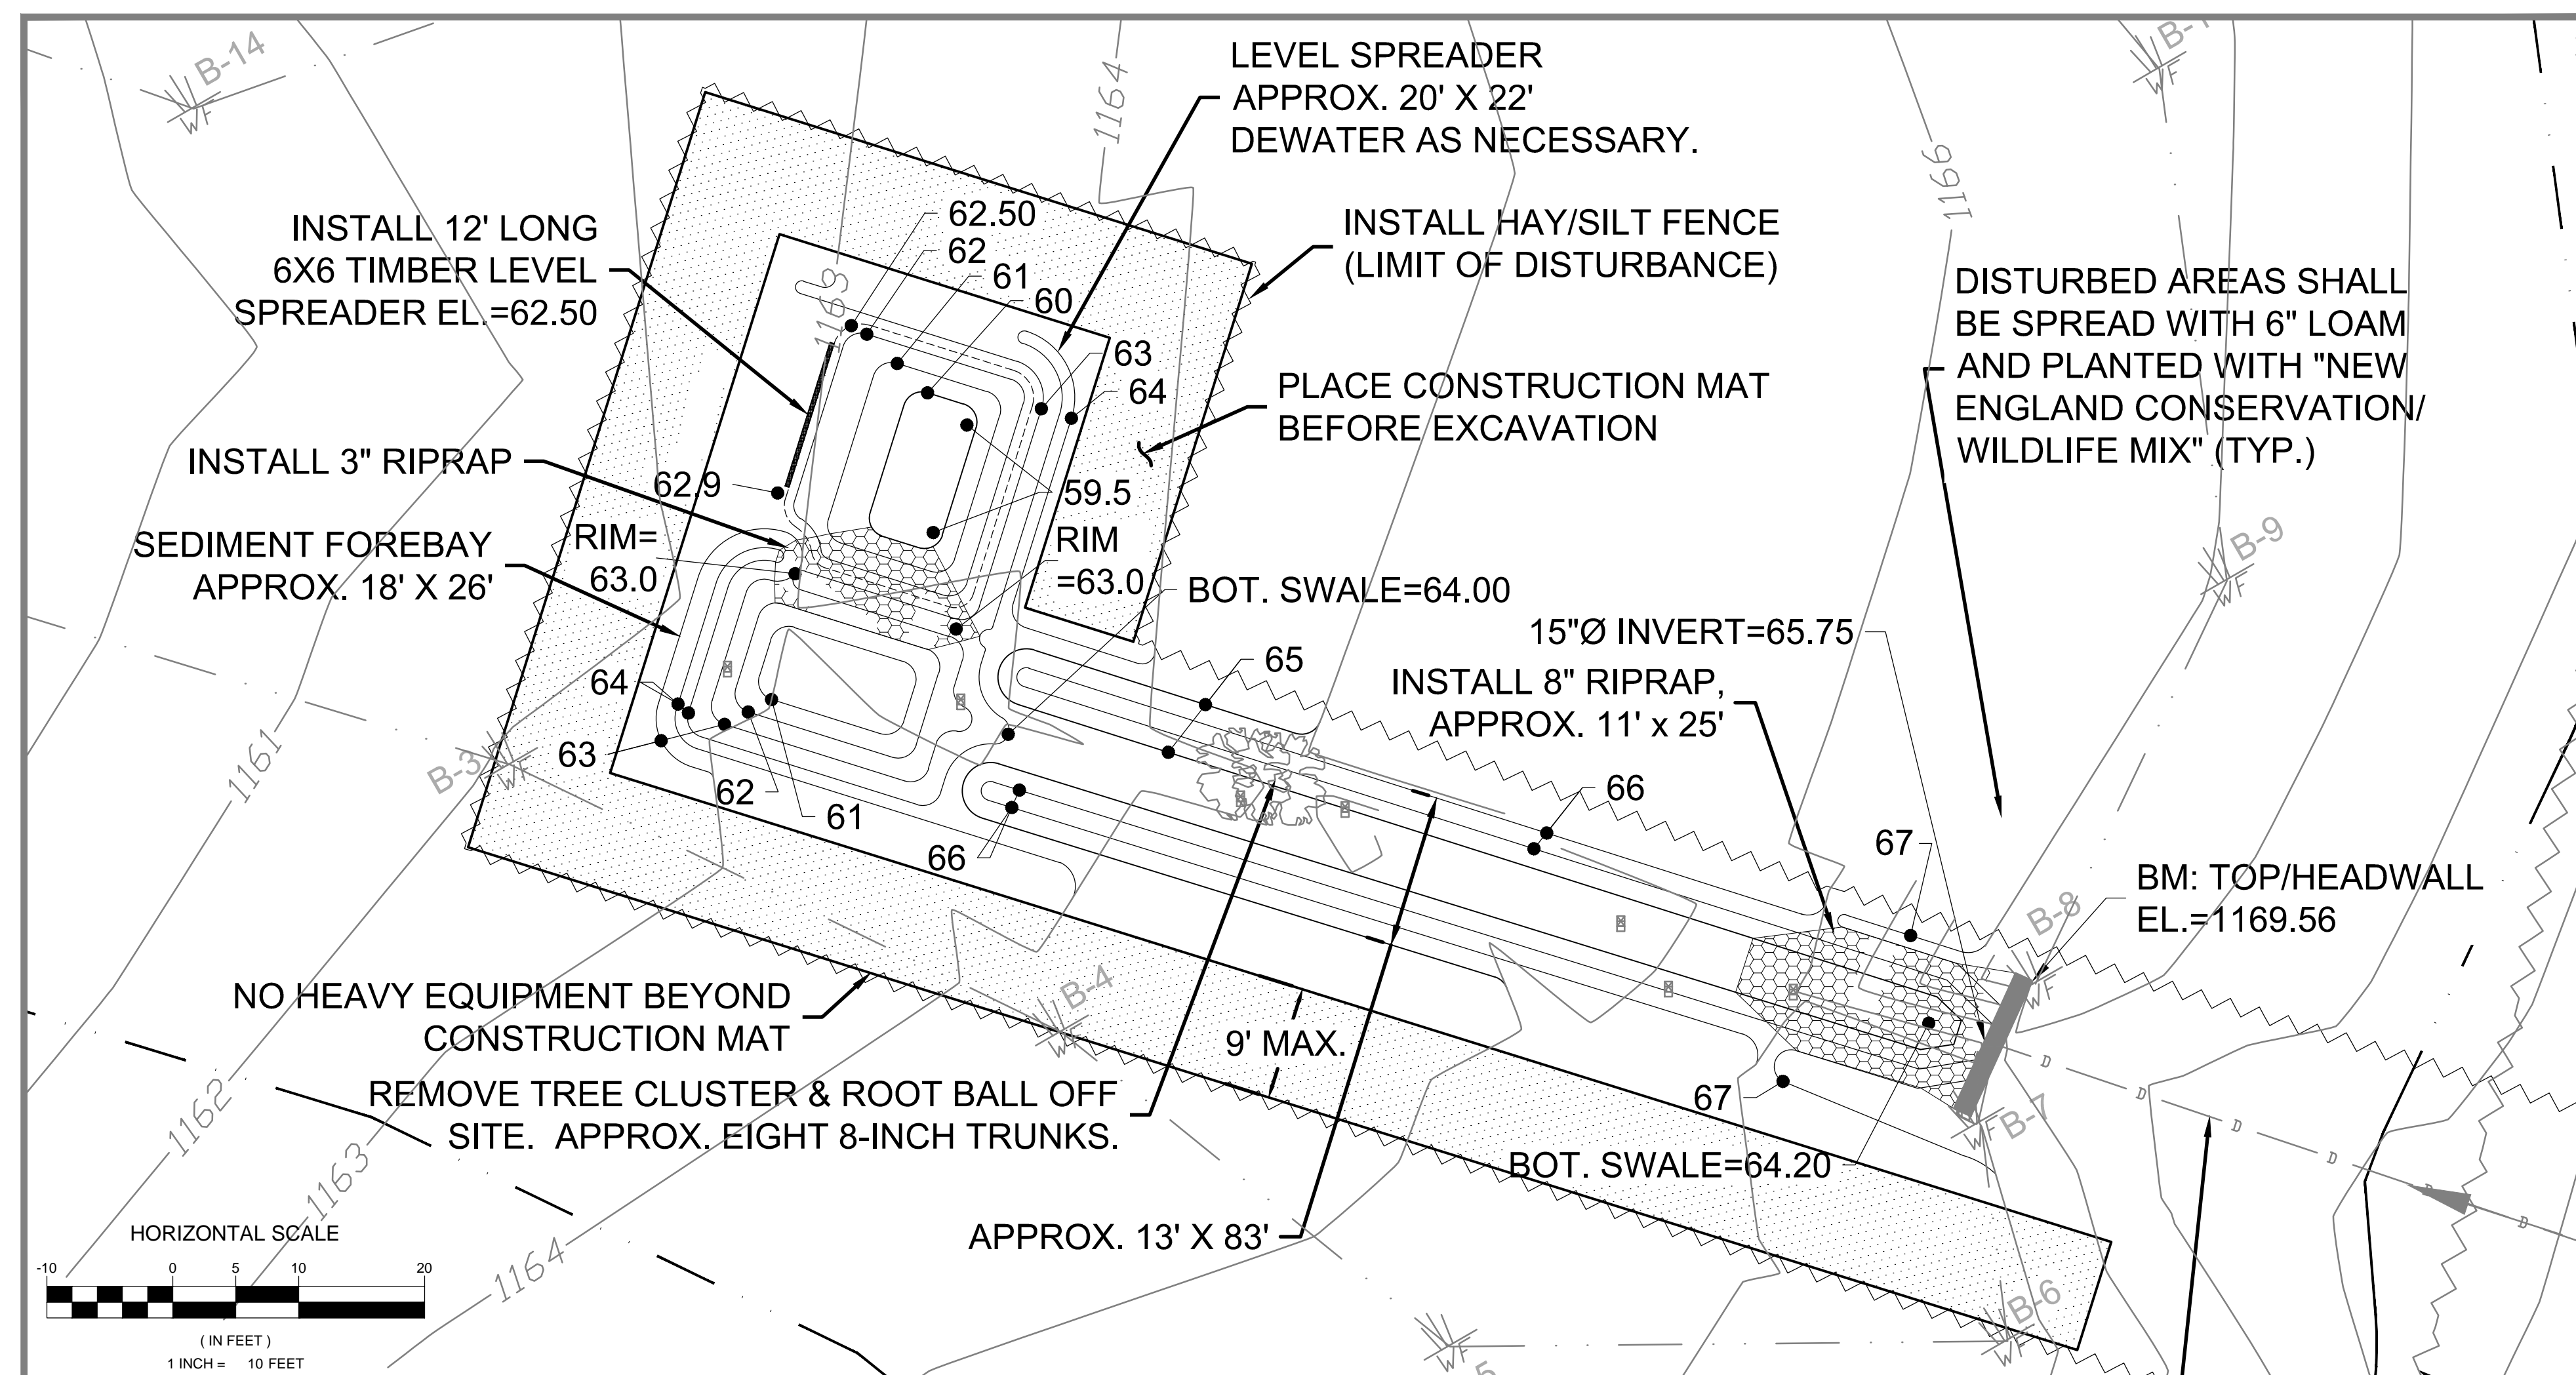

Stormwater discharge from the parking lot had to be treated, detained and soaked back into the earth.

An Energy Dissipater protected adjacent wetlands and Water Quality Swales buffered runoff to the Infiltration Basin.

This system replaced a 40-year old pipe that poured untreated stormwater and sediment into the sensitive aquifer.

The EPA, DEP, Army Corps of Engineers & local Conservation Commission were involved in the permitting.
